

Secure Large File Transfer (SLFT)

Quick, easy, secure transfer of large files to any recipient

Data encryption using advanced software

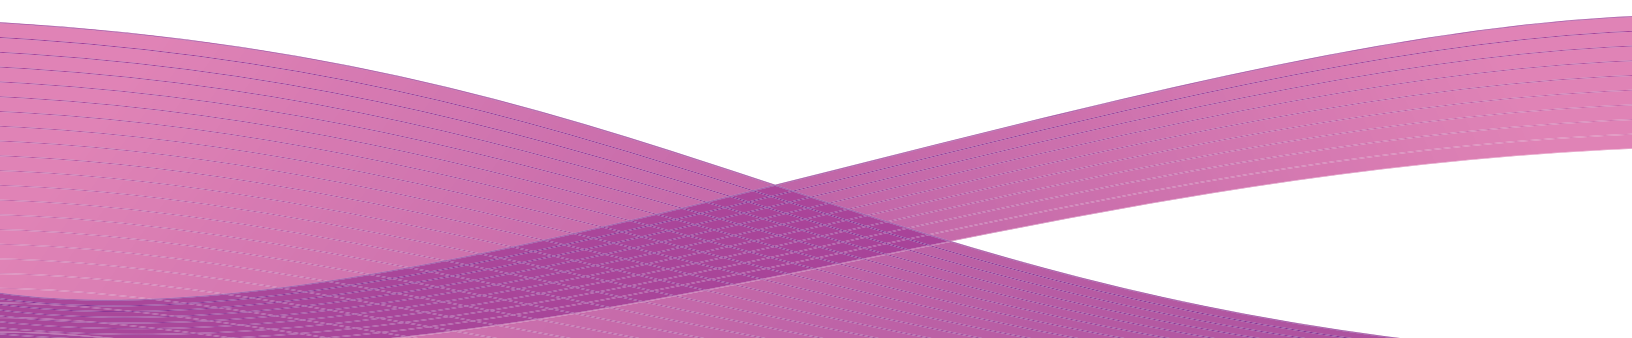

No need for key synchronization or encryption software

Centralized solution supporting files of up to 2 GB in all formats

To date, transferring large files securely has been no easy task. Encryption software, synchronized keys, and size and format limitations have made moving sensitive data a major event.

Now, all that's changed. The ACS Secure Large File Transfers (SLFT) solution, first developed for our own internal use, is now available to you. It's an intuitive, scalable point solution that operates off any standard browser, with virtually nothing to install.

In short, SLFT is secure file transfers made easy.

Secure Large File Transfer (SLFT)

How SLFT Works

Let's say you want to send 900 MB of sensitive data. With our SLFT solution, you simply:

1. Log into a web page
2. Establish an account
3. Upload your file
4. Designate a recipient.

The system automatically:

- Encrypts the data using best-of-breed encryption software
- Securely wipes the original file, so no unencrypted file is stored
- Sends a notification to the recipient, with a link to the system where he or she can pick up the file
 - If the recipient has used the system before, he/she logs in
 - If the recipient has not yet set up an account, he/she is sent a separate e-mail authentication token to set up a user account and acquire the encrypted information.

That's all there is to it.

Why SLFT Is Better

The SLFT solution is:

- Completely centralized and server-based, requiring nothing more than a standard browser to use
- Highly scalable, supporting a full range of file extensions and file sizes as large as 2 GB
- Cost-effective, eliminating the need for encryption software, key synchronization or hardware investments.

Although documentation is available, SLFT is so simple and intuitive that most users can complete the transfer without any training. There's nothing to deploy, and it's completely adaptable to your company's needs.
